

Implementation of REACH

01.01.2022

Ladies and Gentlemen,

for ITW Spraytec Germany LLC & Co. KG the REACH Regulation EC 1907/2006 is an important issue. Therefore we would like to inform you of the current implementation of the REACH Regulation in our house.

As we are aware of the importance of REACH, we took all necessary measures to implement the regulation.

Our products are, corresponding to the definition of the Chemical Agency in Helsinki, "preparations" that do not need to be registered by the Chemicals Agency in Helsinki (ECHA). The registration only required, the substances that are used for the preparation of our products. Therefore, we are in close contact with our raw material suppliers.

As part of this collaboration, we ensure that our raw material suppliers act REACH compliant and registered all substances.

So we can guarantee from today's point of view, that all our products can be delivered in the usual quality and quantity in the future.

Another element of REACH is the, so called, candidate list (SVHC = Substances of Very High Concern), including substances which have a high risk potential for people and the environment. According to current knowledge the products of ITWCP do not contain any substances of the candidate list.

The current list of candidates is available on the following website of the ECHA:

<http://echa.europa.eu/>

You can also find more information on our website: www.ITWCP.de.

In case of further questions you can also contact us by telephone: Tel: +49 (0) 7041-96340

We value our mutual business relationship and thank you for the confidence you put on us during the last years.

Yours sincerely,

ITW LLC & Co. KG
Sven Krautmann
Operations Manager
