Technical Data Sheet VARYBOND VB 90 Chain & Cable Spray with MoS2

Applications:	Application on ball bearings, roller bearings, open-gear transmissions, worm gears and all types of knuckles and articulated joints, machine and precision parts, etc. This heavy duty chain-lube is a most effective lubricant to protect from friction and wear. Regular application results in: reduction of elongation of chains and cables to almost zero, reduction of abrasion and wear through OMC2-technology, reduction of operating temperature through lower friction, high capillary action assures complete surface protection, high surface adhesion prevents throw-off even at high speeds, increase of chain and cable life up to 100%. A thin film with effective adhesion to the surfaces protects from corrosion and high pressures. Helps to reduce settlement of abrasive dust and dirt.
Instructions:	Clean chains/cables thoroughly. It is best if chain can be removed and inside parts brushed by wire brush. Cover cleaned chain inside and outside evenly with lubricant. Re-lubricate with a thin film from time to time.
Product Details:	Displaces water, dissolves rust, repels water, high capillary action, high surface adhesion. Resistant to light acids and leaches. Temperature range from -20 up to 160°C. Not suited for applications in food industry.
Warning:	Pressurised container. Protect from sunlight and do not expose to temperatures exceeding 50°C, i.e. electric lights. Do not pierce or burn, even after use. Keep out of the reach of children. Do not spray on a naked flame or any incandescent material. Keep away from sources of ignition – No smoking. Do not breathe spray. Use in well-ventilated areas. If swallowed, seek medical advice immediately and show this container or label. Use this aerosol only for the applications for which it is intended. Harmful to aquatic organisms, may cause long-term adverse effects in the aquatic environment. Must not be disposed of together with household garbage. Do now allow product to reach sewage system. Hand over to disposers of hazardous waste.

The details from this technical product information are based upon our current position of out knowledge, experiences and the legal requirements. They describe the utilisation of our products under normal operating conditions, without the guaranteeing of any laid down characteristics. They do not release the user from the necessity of own examination and precautionary measures. Our guarantee warrants for the quality of the product, but does not cover the success and effects caused by its utilisation, which are dependent upon a multitude of factors.
